(54) **CHOCOLATE CANDY OF FLORAL PATTERN AND PREPARATION THEREOF** COPYRIGHT: (C)1990,JPO&Japio

(57) Abstract:

PURPOSE: To readily prepare floral patterned, delicious chocolate candy having plural petals outwardly spreading by using shaping mold having high stretchability, elasticity and suitable shape-holding property.

CONSTITUTION: A thin shaping mold 5 of flower having opening part 6 corresponding to base part of flower body and petal part largely spreading from said opening part is provided with elastic material having high stretchability, elasticity and suitable shape-holding property such as natural rubber, silicone rubber or urethane rubber. Ear part 7 of said shaping mold is fixed and suitably colored chocolate according to kind of flower is subjected to tempering and packed from the opening part 6 into the mold, put in refrigerator, then cooled and solidified. After solidification, the ear part 7 is held and released from the mold by spreading the opening part 6 to obtain chocolate candy on which spreading petal is expressed. A candy having matting state of the surface is obtained by using a mold made of natural rubber latex in the shaping.
